1. Introduction

Welcome to the Winstone Prime MT5 User Guide.

MetaTrader 5 is an institutional multi-asset platform offering outstanding trading possibilities and technical analysis tools, as well as enabling the use of automated trading systems (trading robots) and copy trading. MetaTrader 5 is an all-in-one platform for trading Forex, Stocks and Futures.

If you have used MT4 in the past you will notice that much of the functionality in MT5 remains the same. Therefore, this guide is dedicated to the learning how to use the more technical features and new functions within MT5.

2. ABOUT WINSTONE PRIME

Winstone Prime is an robust online Forex CFD provider. The company was founded by a group of professional traders. Our team members have remarkable experience in financial industry brought together we have created a fresh know-how to deliver you an outstanding trading experience with a wide range of trading instruments.

Winstone Prime offers trading solutions for active day traders, scalpers and high frequency traders as well as for new traders and our clients can enjoy cutting edge trading platforms, low latency connectivity with superior liquidity.

We're very proud of a variety of services we provide our clients and partners with, which are of the same quality for all, regardless their experience and amount of their investments.

3. Getting started

Toolbox

Here are all your current trades, History of your trades, News, Mailbox, Calendar, Company, Market, Alerts, Signals, Articles, Code base, Experts and journal.

Charts panel

Charts of specific trading instruments (by your own choice), Trading functions (Buy/Sell), One click trading and Depth of market.

4. Open an account

To open a new MT5 account, please visit your Winstone Prime Cabinet: https://cabinet.winstoneprime.com/traders/

Then select Trading Accounts from the menu. Select whether you want a new live or demo account and choose MT5 as your new account platform. The details of your new account will then be displayed, as well as emailed to you.

Symbols Det	Details Trading							

If you can't see this window – you can either go to **View > Market Watch** use the hot key **CTRL + M**.

It consists of the following tabs: Symbols, Details, Trading and Ticks.

In the **Symbol** column you can find a list of all traded financial instruments (currencies, stock indices, gold, oil) and the current market price for each instrument.

By right-clicking in the window on selected pair, you can bring up the context menu. There are a number of different features within this menu.

	New Order	
	Chart Window	
~	Tick Chart	
	Depth Of Market	Alt+B
1.8	Options Board	
6	Specification	
۲.	Popup Prices	F10
	Hide	Delete
	Hide All	
	Show All	
5	Symbols	Ctrl+U
	Sets	•
	Use System Colors	
	Show Milliseconds	
•	Auto Remove Expired	
	Auto Arrange	
~	Grid	
	Columns	•

- To preview all the tools, select Show All
- You can remove all the tools from the list by clicking on the option **Hide all** or you can remove the tools one by one through **Hide** or **Delete** option button on the keyboard.
- You can change the order of the instruments in the list by holding down the mouse button and moving the tool in the desired direction.
- If you want to make a deal with any of the tools, double- click it. You can activate new order window by clicking F9 on the key board.

This tab Trading allows performing trade operations with a single mouse click.

Market Wa	tch: 14:0	0:38		×
EURUSD			14:00:37	^
SELL	•	0.01 🔺	BUY	
1.08	32°	1.08	841

LOW 1.24568	ا 1.56 د	531	HIGH 1.25276	
Symbol	s Deta	ails Tr	ading	Tick

In other words, when a trader presses the **"Sell"** or **"Buy"** button, a request to perform a trade operation of a specified volume is instantly sent to the server.

Select the drop-down menu **Tools -> Options -> Trade** to make sure that One Click Trading is activated.

This tab **Ticks** of the Market Watch window allows to view tick charts inside the Market Watch window

The red line shows the price to buy, and the blue line - sell price.

6.Symbols

Specification Bars	Ticks								
Winstone Prime	А	A Show expired contracts							
- S Forex	Symbol	Description	Expirat						
Minor	EURUSD	Euro vs US Dollar							
🛐 Exotic	GBPUSD	Great Britan Pound vs US Dollar							
Cross	AUDUSD	Australian Dollar vs US Dollar							
Commodities	NZDUSD	New Zealand Dollar vs US Dollar							
indices	USDJPY	US Dollar vs Japanise Yen							
	USDCAD	US Dollar vs Canadian Dollar							
MCX	USDCHF	USDCHF US Dollar vs Swiss Franc

	GBPUSD, Great B	ritan Pound vs US Dollar							
	Digits								
	Contract size		100000.00						
	of Spread		floating						
	Stops level		0						
	Margin currency		GBP						
	Profit currency		USD						

Symbols is a page where you can find information about a specific symbol. Go View > Symbols or click "Symbols"

by right click on market watch.

Here, you can find contract specification of a symbol, also, you can retrieve bars or ticks to see historic data.

Specification

You can browse symbol properties of each financial product. You may see contract size, maximum/minimum trade size, swap long/short rate and trading hours, etc. Basically, every information you need to know while trading.

1	Bars

You can retrieve historic data of bars. You can choose a time range and select timeframe (M1, 15M, 1H, etc.). Historic data includes Open, High, Low and Close. These can be exported Excel .csv file, simply click "Export Bars" located at the bottom of the window.

Ticks

You can retrieve BID and ASK of a symbol at specific time range. Again, you can export this into an Excel .csv file by clicking 'Export Ticks' button located at the bottom of the window.

7. Navigator window

The Navigator window gives a quick access to various features of the terminal. It can be shown/hidden by the button in the "View" menu, in the "Standard" toolbar or using the "Ctrl+N" key combination.

This tab contains several blocks that divide management of various features of the terminal:

- Accounts
- Indicators
- Expert advisors
- Scripts

All menus can be expanded by the "+" button.

Expert advisors

This group shows all demo and live accounts opened in the terminal. Accounts are divided into groups according to servers they are opened on.

With right click the Delete option you can delete the account from the list.

This group contains indicators — the main tools for analyzing the price dynamics. To add to the chart double click on any of the indicators. You can add an indicator and a drop-down menu Insert -> Indicators.

Winstone Prime

In the window you will see the list with your added expert systems It shows only executable files (*.EX5) of EAs that are stored in the /MQL5/Experts folder taking into account the structure of sub-folders they are stored in.

Scripts

Script is a program written in MetaQuotes Language 5 and is intended for a single execution of the action. Scripts can perform both analytical and trading functions. Unlike experts, scripts are executed on request, not in ticks.

Winstone Prime

8. Tools window

The window can be opened by the " Toolbox" command of the "View" menu or the "Standard" toolbar, as well as by pressing "Ctrl+T" accelerating keys.

The window contains several tabs:

- Trade
- Exposure
- History
- News
- Mailbox
- Alerts
- Signals
- Experts
- Journal

	Source:	alert						~	
	Timeout:	10 sec \sim				Maximum i	terations:	1000	\sim
			OK	Test	Cancel				

Symbol - symbol, whose prices will be used to check the condition.

Condition – condition under which the alert will trigger.

Sound - play a sound file.

Expiration – in this field, one can specify a lifetime for the alert.

Maximum iterations - maximum amount of times the alert repeats triggering. You can

assign an individual sound signal. The file must be in .wav format.

Signals

MetaTrader 4 and MetaTrader 5 Trading Signals is a service allowing traders to copy trading operations of a Signals Provider.

Some traders do not have enough time for active trading, others do not possess enough self- confidence or knowledge to work in the market. Trading signals make traders' money work rather than merely collecting dust on the accounts.

Volumes - show/hide real trade volumes for charts of stock symbols.

Tick volumes - show/hide tick volumes for charts of FOREX symbols.

Zoom in - zoom in the chart.

Zoom out - zoom out in the chart.

Delete indicators window - delete the sub-window of an indicator.

Step by step - shift the chart bar wise to the left.

Save as picture - save the chart as a graphic file (*.png).

Properties - Appearance and properties of each chart in the terminal can be set up individually:

In the window you can choose different colors for each element in the chart as the background color of the candles and buy and sell price.

9. Quick buttons

- Left and Right button on the keyboard moves the chart to the left or right.
- The Home and End keys on the keyboard allow to move the chart at the beginning or at the end.
- + and buttons on the keyboard increase or decrease the size of the graph.
- Alt + 1 show chart as a sequence of bars.
- Alt + 2 show chart as a sequence of candlestick.
- Alt + 3 show chart as a broken line connecting close price of bars.
- **Ctrl** + **G** show/hide grid in the chart.
- Ctrl + L show/hide trade volumes.
- Ctrl + A arrange height of all indicator windows by default.
- **Ctrl** + **I** show indicators list window.

- Ctrl + S save charts as *.HST, *.CSV, *.PRN, *.HTM file.
- **Ctrl** + **P** prints chart in black and white format.
- Delete and Backspace buttons remove the last added object to the chart.
- **F7** button call the window with properties of an EA attached to a chart window for changing its settings
- **F11** button enable/disable full screen mode.

A chart can be managed by the mouse the following way:

- Clicking with the left mouse button on any point in the chart window and holding of it with the subsequent horizontal moving of the cursor result in the chart scrolling;
- Clicking with the left mouse button on the chart vertical scale and holding of it with the subsequent vertical moving of the cursor result in vertical chart scaling, and the double click with the mouse on the chart vertical scale will rescale the chart;
- clicking with the left mouse button on the chart horizontal scale (except for the area of the fast navigation bar) and holding of it with the subsequent horizontal moving of the cursor will result in the chart rescaling;

Clicking with the right mouse button on any point in the chart window results in calling of the chart context menu (described below).

Icons for quick navigation

You can use to work with graphics and the following buttons that are located in the central navigation:

ChartTools

To add different lines and symbols to the chart, you can use the **Insert** drop-down menu in MetaTrader 5 platform. You can remove lines or characters pressing the **Backspace** button on the keyboard or from the settings menu of the chart.

ie Prime

To change the character or object on the chart:

Highlight the desired object by clicking on it twice. Press the right mouse button and select Settings from the menu. Setting window will be appeared. To change the settings of another subject, clear the last selected object with two mouse clicks.

Quick buttons in the toolbar

- -- Crosshair this mode operates only within the active chart window
- Vertical line plot a vertical line in the chart
- Horizontal line plot a horizontal line
- / Trendline plot a trendline in the chart
- Equidistant Channel– placed equidistant top and bottom line
- F Fibonacci Retracement plot Fibonacci Retracement in the chart
- Text add text to the chart
- 🛠 🛛 Symbols drop-down menu with additional clarifying symbo
- | Vertical Line
- Horizontal Line
- / Trendline
- 🚣 Trend By Angle
- Cycle Lines

Lines Channels Gann Fibonacci Elliott Shapes Arrows

Graphical

The "Line Studies" toolbar contains various objects (lines, channels, Gann tools, Fibonacci tools, etc.) that can be imposed to a chart. Commands of this toolbar (except for "Crosshair" and "Cursor") are duplicated in the "Insert" menu.

Select an item from the menu. To add object on the screen, click once on the selected point on the chart and without releasing the mouse move the cursor to the second point. Release the mouse button. The object is added.

To change the location of the object, you must first select it by clicking on it twice. The site is already highlighted and can be moved.

10. Indicators

If necessary, set the parameters of the indicator and press OK. The indicator will appear on the chart.

To remove an indicator from the chart, first highlight it, right-click on it and select Delete indicator. If you use the

same indicators, you can save their template to add it immediately. Select Dropdown Charts -> Templates, select Save Template.

To use the template in a new chart, select the drop-down menu Charts -> Templates, select Load Template.

11. Market Orders

You can open the window for transactions in any of the following ways:

- Select the icon of the New Order from toolbar
- From the drop-down menu Tools -> New order or directly press the F9 key
- Right click on the chart by selecting Trade -> New Order
- Right-click tool in the window Market Watch >New Order

Order window will appear:

)rder		- □ >

Pressing on the yellow button will completely close the position. Will appear a new window with confirmation of the deal

The position is now closed and you can see it in the **History** page.

13. Pending Orders

When working in the market, often a necessity occurs to modify a pending order: set a new activation price, change stop levels or expiration. This can be done from the order modification window or directly in a chart. An order can be deleted in the same window.

Pending orders can be:

- Separate pending orders •
- Pending orders attached to the open positions

Separate pending orders

To place a pending order, open the Order window in one of the following ways:

- From the header toolbar select the icon of the **New Order** •
- From the drop-down menu **Tools -> New** order or directly press the **F9** key •
- Right click on the chart by selecting Trade -> New Order •
- Right-click in the Market Watch window -> New Order •

Select the type of pending order

- Buy Limit trade request to buy at the Ask price that is equal to or lower than that specified in the order. The current price level is higher than the value in the order.
- Sell Limit trade request to sell at the Bid price that is equal to or higher than that specified in the order. The current price level is lower than the value in the order.
- Buy Stop trade request to buy at the Ask price that is equal to or higher than that specified in the order. The current price level is lower than the value in the order.
- Sell Stop trade request to sell at the Bid price that is equal to or lower than that specified in the order. The current price level is higher than the value in the order.
- Buy Stop Limit this type is the combination of the two first types being a stop order for placing Buy Limit.
- Sell Stop Limit this type is a stop order for placing Sell Limit.

After selecting the type of pending order, enter its volume.

Enter the execution **Price** of the pending order. Pending order will be executed only if the market price reaches a preset level.

Stop and **Limit** fields are optional. Through them are set levels of pending orders attached to the main independent pending order (see subsection attached pending orders).

Select **Validity** of pending order. If you set the period of validity and it has been reached before an order is triggered, it will be automatically canceled.

To finish placing separate pending order, click Place order.

You can see the set pending order in page Trade from Tools window.

Deleting/Modifying pending orders

In order to start modifying or deleting a position, it's necessary to execute the " An and of its context menu in the "Trade" tab. After that the following window will appear:

Press the red button **Delete** to delete the pending order.

14. Attached pending orders instone Prime

Unlike independent pending orders, which are used for entrance to the market (open position), attached pending orders are used to exit (closing position).

Attached pending orders are of two types:

- **Stop Loss order** is used for minimizing of losses if the security price has started to move in an unprofitable direction.
- Take Profit order is intended for gaining the profit when the security price has reached a certain level.

To attach a pending order to already open positions, go to the tools window of the platform and select a specific open position to which to attach a Stop or Limit.

To show the following window right - click on the position and select Modify or delete:

Position: #490814 buy 0.01 AUDUSD 0.63601		
AUDUSD	0.63640	
my MMM	0.63630	Type: Modify Position V
March March	0.63620	Stop Loss: 0.63555 🔦 0 🔦 points
mall Manue	0.63610	Take Profit: 0.00000
I	0.63600	
	0.63592	0.63577 / 0.63592
┣	0.63580	Modify #490814 buy 0.01 AUDUSD 0.63601 sl: 0.63555
	0.63570	Stop Loss or Take Profit you set must differ from market price by at least 0 points. Stops processing is performed on the broker side.
9	0.63560	
	0.63555	
2020.04.17 05:29 05:30 05:31 05:32 05:32 0	6:33:36	

Enter zero values in the fields to **Delete** an order and then click Modify.

For additional information you can use the Help section (in English) in the platform by pressing F1.

15. One Click Trading

Another way to place a trade is via the One-Click Trading method. One-Click Trading allow you to place an order directly in the market without the above-mentioned New Order window appearing. To choose this option you must first go to Tools menu > Options > Trade tab and select One-Click trading option.

You can select this by either selecting the Trade Panel button in top left corner of the Window or right clicking on the chart and selecting One Click Trading (or ALT-T)

When you click either the SELL or BUY buttons above you are placing an at Market Execution order at the currently displayed prices and specified volume, i.e. 0.01 lots. You can simply press the up or down arrows to increase or decrease the volume you want to place, or type in the volume directly.

Please note that when selecting price levels for either entry or exits, those prices are never guaranteed to be filled at the exact levels. Slippage may occur.

Another function of One-Click Trading allows you to place a pending order by right-clicking on the chart/window at the precise level you want.

If you right click above the current price level it will present you with the Sell Limit and Buy Stop order options. This will place the order directly at the volume you have selected in the Trade Panel above. Therefore, you can change that pre- set volume within Trade Panel.

16. MetaQuotes Language Editor

Market \	Natch: 06 ·	5:17:53	MetaQu	otes Lang	uage Editor,	F4 ×	👿 USDCHI	

The MetaQuotes Language Editor gives a trader the ability to create customized Indicators, Expert Advisors and Scripts. They can either be created by the inbuilt MQL Wizard or by coding in the programming language known as MQL5 which is native to MetaTrader5.

- Indicators Allow you to display objects on charts that can help you to signal when certain price or other indicator criteria is met.
- Expert Advisors (EA) Are programs that can continually run to automatically produce signals or trades. Also known as Robots or algorithms.
- Scripts Are like programs that can produce a signals or trades; however, they run one time and do not have the ability to run continuous.

To access the MetaQuotes Language Editor in your MT5 platform either find it on the toolbar, Press F4 on the keyboard.

Alternatively, go to Tools menu >MetaQuotes Language Editor.

For more information on the MetaQuotes Language Editor and MQL5 press F1 for the user guide or visit - https://www.mql5.com/en/code

The Strategy Tester allows you to back test performance of Expert
 Advisors/robots and their strategies on previous history within the MT5 platform. This tool can help you to test the efficiency of a programmed strategy on past price quotes as well as establish the best in put variables before running the robot on an account in real time.

There are examples Expert Advisors provided to you in the Platform for you to test, however the functionality of the Strategy Tester is beyond the scope of this documents.

To access the Strategy Tester, you can find it in the toolbar or press CTRL-R.

Alternatively, you can find it under the View menu.

For more information on the Strategy Tester please visit- https://www.metatrader5.com/en/automated-trading/ strategy-tester.
